**Organized by:** Women Development Cell, Government Engineering College, Patan

**Date:** 16th October 2023

**Time:** 11:30 AM to 1:00 PM

**Total Participants:** 40 Students

The **Women Development Cell of Government Engineering College, Patan** organized a highly informative seminar on "**Breast Cancer Diagnosis and Awareness**" on **16th October 2023**, aligning with the observance of **Breast Cancer Awareness Month**, which is recognized globally in October. The seminar was a crucial initiative aimed at promoting awareness regarding the early detection, diagnosis, and treatment of breast cancer among young students.

The session focused on educating participants about the importance of self-examination, recognizing early symptoms, and seeking timely medical advice. The speaker emphasized that early detection significantly improves treatment outcomes and survival rates. Through informative discussions, real-life case studies, and interactive demonstrations, students were taught simple self-check techniques and were made aware of common risk factors associated with breast cancer.

The seminar also highlighted the psychological impact of breast cancer and the importance of emotional support for patients. It encouraged students to become advocates for spreading awareness within their families and communities. The speaker also discussed myths and misconceptions related to breast cancer, emphasizing the importance of breaking the stigma around discussions on women's health.

With **40 students** attending the session, the seminar successfully instilled a strong message of proactive health care and self-awareness. It empowered the participants to prioritize their health, recognize the value of preventive healthcare practices, and spread the message of early screening and timely treatment for breast cancer. This session stood as a testament to the Women Development Cell's commitment to nurturing informed, healthy, and socially responsible individuals.

## Glimpses of the Event
