

Government Engineering College, Patan
Electronics & Communication Engineering Department

Event Report

Title	Open House – Project Presentation (Subject: Linear Integrated Circuits)
Date and Time	07/05/2026 (Thursday), 11:00 AM To 03:00 PM
Mode of Conduct	Offline Mode
Venue	L-212 Project Laboratory, E&C Department, GEC, Patan
Expert Details	Prof. M. L. Patel - Assistant Professor in E&C Department, GEC, Patan
Organized By	Electronics & Communication Engineering Department, GEC, Patan
Objective	The primary objectives of the Open House – Project Presentation were to: • Provide students with a platform to demonstrate their understanding of Linear Integrated Circuits (LIC) through practical project work. • Encourage the practical implementation of theoretical concepts using operational amplifiers, timer ICs, filters, oscillators, and waveform generators. • Develop students' innovation, creativity, and problem-solving abilities. • Promote peer learning through live demonstrations and technical discussions. • Evaluate students' technical knowledge, circuit design skills, and presentation abilities.
Description	The Electronics & Communication Engineering Department, Government Engineering College, Patan, organized an Open House – Project Presentation for the subject Linear Integrated Circuits (LIC) on 07 May 2026 in the L-212 Project Laboratory. The event provided students with an opportunity to demonstrate the practical implementation of concepts learned during the course through innovative electronic projects. A total of 19 student teams, comprising 38 students, participated in the event. Students presented working models based on operational amplifiers, IC 555 timers, filters, waveform generators, voltage regulators, instrumentation amplifiers, phase-locked loops, and other Linear Integrated Circuit applications. Faculty members evaluated the projects based on technical understanding, circuit implementation, innovation, documentation, and presentation skills. The event encouraged interactive learning, allowing participants to explain the design, operation, and applications of their projects. Live demonstrations, technical discussions, and question-and-answer sessions enabled students to strengthen their practical knowledge while improving communication and presentation skills. The Open House successfully bridged the gap between theoretical learning and real-world engineering applications.
Participants	5th Semester Students of the Electronics & Communication Engineering Department.
Outcomes	The Open House successfully achieved the following outcomes: • Students demonstrated a strong understanding of Linear Integrated Circuit concepts through working models. • Participants enhanced their practical skills in electronic circuit design, implementation, testing, and debugging. • The event improved students' presentation, communication, and technical documentation skills.

Government Engineering College, Patan
Electronics & Communication Engineering Department

- Students gained confidence through live demonstrations and technical interactions with faculty.
- The Open House promoted innovation, teamwork, and application-based learning, supporting the principles of Outcome-Based Education (OBE).

Conclusion

The **Open House – Project Presentation** for the **Linear Integrated Circuits** subject was successfully organized by the **Electronics & Communication Engineering Department**, Government Engineering College, Patan. The event provided an excellent platform for students to showcase their technical knowledge and practical competencies through innovative projects. It effectively strengthened the connection between classroom learning and practical engineering applications while encouraging innovation, creativity, and continuous learning among students.

Poster

The poster is a vibrant blue and yellow graphic. At the top, it reads 'OPEN HOUSE – PROJECT PRESENTATION' in large white letters. Below this, the subject 'LINEAR INTEGRATED CIRCUITS' is listed. The date and time are specified as 'Date: 07/05/2026 (Thursday)' and 'Time: 11:00 AM To 03:00 PM'. The venue is 'L-212 Project Laboratory, E&C Department, GEC, Patan'. It is organized by the 'Electronics & Communication Engineering Department' of 'Government Engineering College (GEC), Patan'. The coordinator is 'Prof. M. L. Patel', an Assistant Professor in E&C Department, GEC, Patan. The poster features illustrations of students working on breadboards and a large central image of a microchip. Logos of the department and college are also present.

**OPEN HOUSE –
PROJECT PRESENTATION**

**Subject:
LINEAR INTEGRATED CIRCUITS**

Date and Time
Date: 07/05/2026 (Thursday)
Time: 11:00 AM To 03:00 PM

Venue:
L-212 Project Laboratory,
E&C Department, GEC, Patan
