

Government Engineering College, Patan

Electronics & Communication Engineering Department

Title	Industry Expert Session by United Instruments.
Date and Time	08/05/2026 (Friday), 11:00 AM – 12:30 PM
Mode of Conduct	Offline Mode
Venue	Seminar Hall, Amenity Building, GEC Patan
Facilitator	Mr. Mitesh Patel, Director of United Instruments Services, Vadodara (Leading provider of Industrial Equipment, Instrumentation, IoT, Embedded Systems, Automation Solutions, and Engineering Services).
Organized By	Electronics & Communication Engineering Department, GEC, Patan.
Objective	The primary objectives of the Industry Expert Session were to: • Provide students with exposure to the latest industrial technologies and engineering practices. • Bridge the gap between academic learning and industrial requirements. • Create awareness about applications of Instrumentation, IoT, Embedded Systems, Automation, and Industrial Equipment. • Introduce students to career opportunities and skill requirements in the automation and embedded industries. • Strengthen Industry–Institute interaction and explore future collaboration opportunities for training, internships, and placements.
Description	The session was conducted by Mr. Paras Kalariya, who guided students on living a The Electronics & Communication Engineering Department, Government Engineering College, Patan, organized an Industry Expert Session on 08 May 2026 in the Seminar Room for the students of the Electronics & Communication Engineering Department. The session was delivered by experts from United Instruments, a leading organization working in the fields of industrial equipment, instrumentation, IoT, embedded systems, automation solutions, and engineering services. The experts shared valuable knowledge on emerging industrial technologies, current trends, practical engineering applications, and industrial expectations from engineering graduates. During the session, the experts discussed the importance of industrial automation, instrumentation systems, embedded technologies, Internet of Things (IoT), and their applications in modern industries. They also explained how students can prepare themselves for careers in the automation and embedded sectors by developing strong technical fundamentals, problem-solving skills, and practical knowledge through internships, industrial training, and project-based learning. The department also introduced its initiative to establish an Industry–Institute Collaboration with United Instruments. The proposed collaboration aims to provide students with opportunities for industrial training, internships, expert lectures, workshops, student projects, faculty development programs, placement assistance, career guidance, and skill development initiatives. The initiative is expected to strengthen the relationship between academia and industry while enhancing students' employability. The session concluded with an interactive question-and-answer session where students actively participated and clarified their queries related to industrial technologies, internship opportunities, required technical skills, and career prospects.
Participants	Students and faculty members of the Electronics and Communication Engineering Department.

Electronics & Communication Engineering Department

Outcomes	The Industry Expert Session successfully achieved the following outcomes: • Students gained an understanding of the latest industrial technologies in Instrumentation, IoT, Embedded Systems, and Automation. • Participants became aware of current industrial practices and career opportunities in the automation and engineering sectors. • Students understood the importance of technical skills, internships, industrial training, and continuous learning for career growth. • The interaction with industry experts motivated students to prepare for industry-oriented careers and enhance their professional competencies. • The proposed Industry–Institute Collaboration created opportunities for future training programs, internships, workshops, student projects, and placement support.
Conclusion	The Industry Expert Session organized by the Electronics & Communication Engineering Department, Government Engineering College, Patan, was highly informative and beneficial for the students. The session provided valuable insights into industrial technologies, engineering practices, and career opportunities in the fields of Instrumentation, IoT, Embedded Systems, and Automation. The proposed collaboration with United Instruments is expected to significantly enhance students' practical exposure, technical skills, internship opportunities, and employability, thereby strengthening the institute's industry connect.
Poster	 GOVERNMENT ENGINEERING COLLEGE, PATAN DEPARTMENT OF ELECTRONICS AND COMMUNICATION ENGINEERING Organizes INDUSTRY EXPERT SESSION For Students of E&C Engineering by UNITED INSTRUMENTS Leading provider of industrial equipment, instrumentation, automation solutions and engineering services.  DATE 08/05/2026  TIME 11:00 AM  VENUE Seminar Room  INDUSTRY–INSTITUTE COLLABORATION The department is planning collaboration with United Instruments for training, internship and placement opportunities for students. Industrial Visits Internship & Training Programs Expert Lectures & Workshops Student Projects & Research Activities Faculty Development Programs Placement & Career Guidance Skill Development Initiatives All students are instructed to attend the session positively and be on time. Your Participation, Your Future!
