

Government Engineering College, Patan
Electronics & Communication Engineering Department

Event Report

Title	Introduction of VLSI Club Activities.
Date and Time	17/02/2026 (Tuesday), 01:00 PM To 02:00 PM
Mode of Conduct	Offline Mode
Venue	Seminar Hall (204), EC Engineering Department, GEC Patan
Expert Details	Prof. M. L. Patel - Assistant Professor in E&C Department, GEC, Patan
Organized By	VLSI Club, Electronics & Communication Engineering Department, Government Engineering College, Patan.
Objective	The primary objectives of the Introduction of VLSI Club Activities session were to: • Introduce students to the vision, mission, and objectives of the VLSI Club. • Create awareness about the importance of VLSI and semiconductor technologies. • Inform students about the technical, academic, and industry-oriented activities planned under the VLSI Club. • Encourage students to actively participate in workshops, expert lectures, industrial visits, competitions, and hands-on training programs. • Motivate students to build a strong foundation in digital electronics, semiconductor technology, and chip design.
Description	The Electronics and Communication Engineering Department, Government Engineering College, Patan, organized an Introduction of VLSI Club Activities session on 17 February 2026 in the Seminar Hall under the banner of the VLSI Club. The session was organized to familiarize students with the newly established VLSI Club and its role in enhancing students' technical knowledge and industry readiness in the field of semiconductor technology. During the session, the coordinators explained the vision and mission of the club and emphasized the growing importance of Very Large-Scale Integration (VLSI) in modern electronics. Students were introduced to the various activities planned under the VLSI Club, including technical workshops, expert lectures, industrial interactions, hands-on training sessions using Electronic Design Automation (EDA) tools, technical competitions, mini projects, and career guidance programs. The session also highlighted the opportunities available for students to strengthen their technical skills and improve their employability in the semiconductor industry. The major topics discussed during the session included: • Overview of the VLSI Club • Vision, Mission, and Objectives of the Club • Planned Technical Activities and Events • Learning Opportunities in VLSI and Semiconductor Technology • Student Participation and Membership • Interactive Question & Answer Session The interactive discussion encouraged students to actively participate in club activities and clarified their queries regarding VLSI learning pathways, internships, and future career opportunities.

Government Engineering College, Patan
Electronics & Communication Engineering Department

Participants	Undergraduate students of the Electronics and Communication Engineering Department (Total: 44)
Outcomes	The session successfully achieved the following outcomes: - Students gained a clear understanding of the objectives and activities of the VLSI Club. - Participants became aware of the learning opportunities available through club activities. - Students were motivated to actively participate in workshops, seminars, competitions, and technical projects. - Awareness regarding VLSI technology, semiconductor engineering, and career opportunities was significantly enhanced. - The session promoted industry-oriented learning and encouraged students to develop technical and professional skills.
Conclusion	The Introduction of VLSI Club Activities session was successfully conducted by the VLSI Club of the Electronics & Communication Engineering Department, Government Engineering College, Patan. The session effectively introduced students to the club's vision, objectives, and planned activities while emphasizing the importance of VLSI and semiconductor technology in today's electronics industry. It inspired students to actively participate in club initiatives and prepare themselves for emerging career opportunities in the semiconductor domain.
