

Government Engineering College, Patan
Electronics & Communication Engineering Department

Event Report

Title	VLSI Industry Expert Session
Date and Time	09/05/2026 (Saturday), 11:00 AM – 12:00 PM
Mode of Conduct	Online (Google Meet)
Venue	Google Meet Link: meet.google.com/zgv-gvak-nmv
Expert Details	Mr. Aman, Module Leader, Eximietas Design Pvt. Ltd.
Organized By	VLSI Club, Electronics & Communication Engineering Department, Government Engineering College, Patan
Objective	The primary objectives of the VLSI Industry Expert Session were to: • Provide students with insights into the latest trends in the VLSI and semiconductor industry. • Bridge the gap between academic learning and industry requirements. • Create awareness about career opportunities in the VLSI domain. • Familiarize students with real-world industry challenges and expectations. • Motivate students to pursue careers in semiconductor chip design and VLSI technology.
Description	The Electronics and Communication Engineering Department, Government Engineering College, Patan, under the banner of the VLSI Club, organized an online VLSI Industry Expert Session on 09 May 2026 through Google Meet. The expert session was delivered by Mr. Aman, Module Leader, Eximietas Design Pvt. Ltd., who shared valuable insights into the rapidly growing semiconductor industry and current developments in Very Large-Scale Integration (VLSI) technology. During the session, the speaker discussed the latest trends in VLSI, emerging opportunities in semiconductor chip design, industry expectations from engineering graduates, and the future scope of semiconductor technology. He also highlighted the practical challenges faced by the industry and emphasized the importance of strengthening fundamentals, continuous learning, and acquiring industry-relevant technical skills. The major topics covered during the expert session included: • Emerging Trends in VLSI • Career Opportunities in the Semiconductor Industry • Industry Challenges and Expectations • Future of Semiconductor Technology The session concluded with an interactive discussion in which students actively participated by asking questions related to career planning, higher education, required technical skills, internships, and placement opportunities in the VLSI domain.
Participants	Undergraduate students of the Electronics and Communication Engineering Department (Total: 20) Faculty members of the institute (Total: 04)

Government Engineering College, Patan
Electronics & Communication Engineering Department

Outcomes	The expert session successfully achieved the following outcomes: • Students gained an understanding of current trends in the VLSI and semiconductor industry. • Participants became aware of various career opportunities available in VLSI design and semiconductor technology. • Students understood the practical challenges and expectations of the VLSI industry. • The session motivated students to enhance their technical knowledge and develop industry-relevant skills. • The interaction with the industry expert increased students' confidence and provided valuable guidance for higher studies, internships, and future career planning.
Conclusion	The VLSI Industry Expert Session was successfully organized by the VLSI Club of the Electronics & Communication Engineering Department, Government Engineering College, Patan. The session provided students with first-hand industry knowledge and practical insights into VLSI technology and semiconductor engineering. The expert guidance inspired students to strengthen their technical competencies and prepare for rewarding careers in the semiconductor industry. The event effectively fulfilled its objective of promoting industry-oriented learning and bridging the gap between academic education and industrial practices.
